Link: https://confirm.udacity.com/ZGQUHNNE   Issued May 2022

SUMMARY (Certifications)

Create and style web components
Debug HTML and CSS code
Position and display website elements
Build a responsive website layout
Build a website using WordPress
JavaScript & the DOM
TypeScript Fundamentals
Web APIs and Asynchronous Applications
Work with Node and Express to develop a web app
React & Redux & React Router
Build Tool - Webpack
Unite Testing with Jest
Foundations of Agile

EXPERIENCE

Projects that I developed:

- **Single-Page Developer Portfolio**

Overview: This is a solution to the Single-page developer portfolio challenge on Frontend Mentor. The purpose is to improve my coding skills by building realistic projects.

Built-with: HTML5, CSS3, Bootstrap5, JavaScript, and webpack5

Preview: https://preview.bayoumi.dev/single-page-developer-portfolio/
Github: https://github.com/Bayoumi-dev/single-page-developer-portfolio

- **My Portfolio Website**

Overview: This is my portfolio to display my work
Built-with: HTML5, CSS3, and JavaScript

Live: https://bayoumi.dev/

- **Aluminatek Landing Page**

Overview: I designed and developed a landing page for an aluminum website in Arabic. The landing page serves as an introduction to the company's services and features a clean design with high-quality visuals. The page is designed to be simple and intuitive.

Built-with: HTML5, CSS, Postcss, JavaScript, Node JS, Express, Nodemailer, Figma.

Preview: https://preview.bayoumi.dev/aluminatek-landing-page/

- **Dine Restaurant Website**

Overview: This is a solution to the Dine restaurant website challenge on Frontend Mentor. The purpose is to improve my coding skills by building realistic projects.

Built-with: React JS, React Router, TypeScript, and Tailwind CSS

Preview: https://dine.bayoumi.dev/
Github: https://github.com/Bayoumi-dev/Dine-restaurant-website

- **Construction Landing Page**

Overview: This is the Construction landing page. The purpose is to improve my coding skills by building realistic projects.

Built-with: HTML5, Tailwind CSS, and JavaScript

Preview: https://preview.bayoumi.dev/Construction-lan...
Github: https://github.com/Bayoumi-dev/Construction-la...

- **Evaluate a News Article with NLP**

Overview: This project aims to build a web tool that allows users to run Natural Language Processing (NLP) on articles or blogs found on other websites. When a user submits a URL of an article, the web page then displays sentiment analysis returned from Meaningcloud API, based on the contents of the article.

Built-with: HTML & SCSS, JS, Node JS & Express, CORS, Node Fetch, Dotenv, Webpack, Jest

Github: https://github.com/Bayoumi-dev/evaluate-news-article

- **Would You Rather App**

Overview: In the "Would You Rather?" Project, A web app that lets a user play the "Would You Rather?" game. The game goes like this: A user is asked a question in the form: "Would you rather [option A] or [option B]?". Answering "neither" or "both" is against the rules.

Built-with: React & React Router, Redux Toolkit, Semantic UI
